## 1. INTRODUCTION

For the purposes of Regular Selection for the Boulder & Lead discipline to the 2023 Australian Continental Climbing Team (Team), a **Combined Calculation based on Australian Open National Qualifying Events** (National Open Bouldering Championships & Lead Selection Event) will be used.

This document details how ranking will be determined related to the Regular Selection of Boulder/Lead athletes to the 2023 Oceania Continental Championships. Ranking calculation has been adopted from IFSC policies as used in the 2023 IFSC World Championships.

This document should be read in conjunction with the [2023 Oceania Olympic Qualifier Selection Policy](#) (Selection Policy).

## 2. RANKING CALCULATION

Ranking calculation will be based on the procedure for the Bern 2023 IFSC World Championships.<sup>1</sup>: A combined Boulder & Lead ranking will be calculated from the General Rankings for the competitions in the Boulder and Lead disciplines, assigning ranking points as set out at Annex 3 ([Cup Ranking Points](#)) to each set of results. A points total will be calculated for each competitor participating in both Boulder and Lead disciplines and these competitors will be ranked in descending order of the total points awarded and the ranking published.

Following this article, a Boulder & Lead ranking will be generated at the end of the Australian Open National Qualifying Events. From this ranking, regular selection will be carried out as per Section 3.1(c) of the Selection Policy.

For the avoidance of doubts:

- a) Athletes that achieve a valid ranking only in one single discipline will not be eligible for such ranking
- b) The ranking used to generate the points are the absolute ranking within the single disciplines (not adjusted)
